

## **Working with the Psychological Sequelae of Major Physical Trauma**

**Dr Laura Toplis**, Principal Clinical Psychologist, East of England Major Trauma Centre, Addenbrooke's Hospital, Cambridge and Board Member of the UK Psychological Trauma Society (UKPTS).

### **Level: Introductory**

The primary aim of this workshop is to examine ways of working with the psychological sequelae of major physical trauma, in both the acute and chronic phases.

The intended learning objectives include:

- Knowledge, skills and values
- A knowledge of the development of Major Trauma Centres.
- An understanding of the importance of the psychological sequelae of major physical trauma.
- An awareness of the evidence base and best practise guidelines for working with the most prevalent psychological difficulties at the most appropriate time.
- An understanding of the main clinical issues when working with traumatic amputations and longer term disabilities.
